[Standard Installation](#)

STANDARD INSTALLATION

A Standard Installation includes the following:

- Professional installation of WildBlue CPE by a Certified Installer
- Travel to and from subscriber location within 50 miles of installer office
- Up to 150 foot of RG-6 cable from antenna to modem
- Cable routed through one exterior wall and one interior wall or floor

*Non-standard installations may result in additional charges. Please confirm with the premise technician that your installation will be standard **prior** to allowing the technician to start work. If your installation is non-standard, any additional charges must be agreed upon between subscriber and premise technician prior to beginning work.*
